40€ menu,
drinks not included

MINI-CONFERENCE CYCLE ON CONCEPTS ALLOWING A TRUSTWORTHY UNDERSTANDING OF CLIMATE CHANGE

1st October 2024

Energy: types, conservation,
transformations, usefulness and what is left

12th of November 2024

Atoms, their nuclei, electromagnetism
and the two nuclear forces

3rd of December 2024

Gravity and how the Sun works;
the dream of controlled fusion

14 th of January 2025

Carbon's greenhouse gases: carbon dioxide
and methane. The carbon cycle.

4th of February 2025

Oxygen, its cycle and transforming power.
Life's mark

11th of March 2025

Water, its manifold and surprising features,
and the role of oceans

April

Monitoring human activity:
the balances of complete cycles

May

The atmosphere: its absorptivity,
transparency, reflectivity and emissivity

June

The Earth's outer layers and
its energy flux (dis)equilibrium
